Election-Tuesday, November 6.

For Kurope.
The next number of The Tribune for Europe circulation will be issued to morrow morning at 9 o'clock. It will contain all the latest news received up to the time of going to press. Europa sails from Boston on Wednesday.

THE NEWS PROM EUROPE, though it does not bring the response of the Russian Autocost to the Turkish refusal to surrender the Hun varian Refugees, is interesting and important. The French Ministry have determined to adhere to the views on the Reman question laid down by Napoleon in his letter to Ney, and both Falloux and Thiers are balaed. Mr. Thiers has made an elaborate report to the Assembly, in which he is said to argue that the organization of the Roman Catholic Church and the so-called Rights of the People are incompatible with each other, and that he latter ought to give way ; and Mr. Falloux is going to leave the Ministry because it says it will not act forther on the same doctrine. The question of a Central Power for Germany has been prorisionally settled by a treaty between Austria and Prussia, so that the wiseacres who expected a war in that quarter are disappointed for the pres ent. The Hungarians who were at Comorn are coming to America with Kiapka at their head; and those who are at Widdin are about to be trans forred to the lale of Candia by the Turkish Gov. ernment. From there they can easily get off to England. The report that Bem has turned Turk is confirmed, and it is said that Dembioski and others have done the same, and are now officers in the Turkish army.

The deliberations of the National Assembly were almost wholly devoted, on the 12th and 13th uit to the report of M Thiers on the Koman question. The report is decidedly conservative, and at variance with the expressed views of the President's letter to M. Ney. The conclusion at which M Thiers arrives is that ilberal institutions are incompatible with the independence of the Pops as stemporal Severeign, and likewise that the independence of the Catholic Church and the rights of the people are allesse, in which case the latter ought to give way. It is not believed that the views of M. Cotton Up.

Business appears to have undergone no maierial change since the sating of the Europa.

The Cotton market continued in a very excited state-railer increased by the news from New York by the Hibbertia up to Thursday, on which day the Cambrid's news was made public, which caused a subtomed feeling to prevail in the market, and on Friday a slight decline in prices was established, the sairs being less than 00 any previous day for a pward of a week.

The Cotton market overed on Monday at an advance of a to I over the care current at the sating of the Europa. The Manchester market on Lessday was very firm, and an advance was readily obtained in both goods and warm, which fast that the effect to tagefre increased conficience in the Liverpool market; and another first took place, and transactions in American descriptions were effected at 4d per 10 above the prices of the previous Saturday. The sales of Cotton in the week ending 19th were larger than on any previous occasion in Liverpool, amounting to 181,009 alee, of which speciators took 5620. Exporters, LiTo—the remainder, 64,00, were taken by the irster. The Committee's quotations for fair Mobile and fair Upland was 644 to 69 per th. The total stock in Liverpool is estimated at 437,000 bales, against a stock at this time in 1842 of \$30,000. Gen. Hayman's his administration of the military affairs of Hungary leases no opportunity to preserve the bloody colline that has been so universally applied to him. He has thus far succeeded in nurdering, under the guise of a Court Martial, thirteen Hungarian Generals who delivered themselves up at the close of the war and induced their a deliver to lay down their arms. Death of Bathyany.

Count Hathyany, the Frime Minister of Hongary, has been abot under circumstances which forever will make the Austrian name synonymous with cruelty, treachery and dishonor. To render the last hour of this brave and accomplished nobleman as bitter as possible, he was sentenced to a malefactor's instead of a coldier's death. To avoid the ignomy of a haller, the wife of the patriothad a dagger conveyed to him in his linen, with which to anticipate his doom. The Count did not succeed in the suicide, but his throat was so much injured by the wound he had indicted that he had prevented his nurderers from stranging him with the cord. He full pierced to the heart by the buillets of Austrian soldiers—his last words being "My country forever." Some ladies of the highest class endeavored to dip their hands into the blood of the fallen patriot, but were prevented by the Austrian bayonets.

The Affair of June 13—A Court put to Flight.

The High Court of Justice at Versallies commenced its sittings on the lith, and is at present engaged in trying the persons concerned with the affairs of lith June. Several excitable and disreputable scenes have occurred before the Court, and there is reason to apprehend that others will follow. On the lith, Col. Forester being on trial, M. Emile de Girardin was being examined as a winness, when a violent alterestion took place been him and the Procurreir General, in the course of which M. Girardin declared, in open Court, that the Constitution having been violated, resistance was a right and a duty.

At a subsequent stage of the examination the Judge forbade M. Girardin to reply to a remark of one of the counsel, when all the prisoners arose on same and demanded with violent gesticulations that the witness should be heard. A fearful seeme of tumult and confusion ensued, and nearly an hour elapsed before the assesser could bring the accused and the Judges to a state of calimness.

Ou the day following one of the witnesses, a Lieutenat of the gendaments, boasted of having thrusted his sabre into the breast of a man who was unarmed and advanced with his bosom bared; whereupon all the accused rose up and denounced the witness as a coward one of the counsel declaring that he are not one of the counsel of the owners declared when he are not one of the counsel of the owners of the counsel of the owners of the wever, is not large.
